

BRINGING CRISIS SIMULATION TO LIFE

## Train, Practice and Exercise with ISEE Online

ISEE Online is incident simulation software specifically designed to help hospital and pre hospital management and staff effectively deal with incidents and full scale emergency management.

ISEE Online allows you to test and develop plans and procedures, build skills and exercise for regular scenarios and the completely unusual. Train and exercise with staff, management and emergency services for Incidents and emergencies such as:

- Fire
- Flood
- Power outage
- Terrorist attacks
- Infrastructure and system failure
- Pandemic
- Mass Casualty incidents
- Hospital evacuation

By simulating a realistic and engaging representation of personnel, resources, patients and infrastructure, students can be immersed in scenarios lasting from a few minutes to hours.

Using the inbuilt mapping functions, ISEE Online integrates time and distance into your exercises. Train for major accidents, mass casualties and hospital disasters by integrating the logistical challenges of transporting patients and equipment between real scenes.

## Why ISEE Online?

- Easily create and tailor training scenarios to match real life incidents in your hospital, district or state
- Practise scenarios on the web – anywhere, anytime
- Multi-disciplinary training capability
- User interface in any language
- Instructor training and support
- Easy integration into your existing training programs
- Reset your scenario and play again in 3 clicks
- Treatments, transport and decision making timed by the simulation – good-bye stopwatch!
